We all know nature evolves and adapts whether it is in physical life or logical life. In the last few years the technology has changed the way we learn & communicate. Today the mobiles are more in number than the population of seven billion in the world. No other common man's instrument has matched this. This is changing the way the Education, Information & Entertainment has been viewed all along. The tablets are replacing the slates and books, the apps are replacing the customized softwares & 3D glasses are changing the way we have been seeing entertainment in Theatres, TVs & Computers. Your Company is adapting these new tools & also train human power to adopt these evolves.

At our business, we are evolving cost effective new methods & apps so that the old 2D films and contents can be converted to new way of exhibition so that the content is continuing to be the king whether old or new. Our new 3D animated movie "Gulliver and the Lilliputs" is being released shortly in digital 3D (with glass) all over the world. There are stream of own productions, distribution and conversion services of digital contents to big, small and personal screens using the new technologies. The evolving Google glasses & 3D printing is going to revolutionise the way we have been thinking & doing.

I am confident with usual the support of our stakeholders, we will be able to adopt & evolve to these new approaches.

Thank you one and all.

Growth in new media: The rapid increase in mobile and wireless connections continues to drive the growth of internet penetration in India. Key beneficiaries are emerging new media segments, which include internet advertising, online classifieds, and gaming, all of which are on a rapid growth path. India remains a growth market for 'traditional' media as evidenced by the growth last year in TV audiences, radio listenership, and footfalls in theatres. India is an outlier country, where print is still a growth market. There is growing overseas demand for quality Indian animation/VFX work at affordable pricing. Traditional media is also increasingly offered on new media platforms. The M&E sector could be a noteworthy employer across creative, technical and business areas. With potential mushrooming of TV and radio broadcast channels and growth in skill intensive sectors of film, animation, gaming, VFX, this is only set to escalate. In the talent driven media sector, companies could potentially differentiate based on ability to attract and retain the right people..source FICCI

"Emerging technologies such as social media, mobility, analytics and cloud (SMAC) are driving the growth in this segment and helping it move to the next level,".
